

NOVEMBER 22

WHO IS GALAXOLIDE ?!

**VERY THICK MATERIAL, MOST
OF THE TIME USED AS 50%
DILUTION IN IPM**

M.W: 258.4

VAPOR PRESSURE: 0.00054 MMHG @ 25 °C

**A WELL-KNOWN MEMBER OF
THE GROJSMAN ACCORD.**

**IT'S KNOWN FOR ITS FIXATIVE
EFFECT, ESPECIALLY IN LIGHT
CITRUSY FORMULAS.**

**A LOT OF PEOPLE ARE ANOSMIC
TO THIS MATERIAL.**

**KEEP TRYING SMELLING IT, YOU MAY SMELL IT
AFTER LONG PERIOD OF EXPOSURE.**

**IT GIVES SO OPULENT MUSKY
BACKGROUND.**

**I USE IT A LOT, ESPECIALLY IN
MUSKY, FLORAL, AND CITRUSY
COMPOSITIONS.**

**BLENDING IT WITH FRESH
SPICES
(EX. NUTMEG OR BLACK PEPPER EO)
COULD MAKE SO GOOD
DIMENSIONAL EFFECT.**

NOVEMBER 22

**TRY TO USE IT IN "WHITE
COTTON-SHIRT" ACCORD WITH
GLOBALIDE, TONALIDE & OTHER
MUSKS.**

**IT'S ALKALI-STABLE AND
DOESN'T DISCOLOR IN LIGHT.
(SO IT'S A GOOD CHOICE FOR SOAP &
DISHWASHING DETERGENT FRAGRANCES).**

**I LIKE TO USE IT IN MY
SENSUAL SKIN ACCORD,
& IN MY SIGNATURE WOODS
BASE.**

**ALSO, I PREFER TO USE IT AS A
SUPPORTIVE BACKGROUND IN
FLORAL FRAGRANCES WITH
ETHYLENE BRASSYLATE.**
